

ALPHAFLEX

Start with your vision

Why ALPHAFLEX?

• Outstanding print quality and performance

Printing decks with the latest W&H technology are the key to outstanding print quality. Optimized technology and drying tunnel length ensure a consistent and unwavering production speed of 400 meters per minute.

• Sustainable

Our updated drying technology, with a new switchable blower function, helps you to be more sustainable by optimizing energy consumption. We have designed a press that is built for the future and ready for any challenge – whether mono-materials, PCR or paper, solvent or water-based inks.

• Easy to operate

Operating a press has never been easier. The new comprehensive machine design combined with W&H's EASY-SETUP guides the operator through the entire setup, register and impression process in an optimized, effective and time-saving manner.

Your advantages

- ✓ Outstanding print quality
- ✓ Environmentally-friendly production with optimized drying technology and minimal energy and resource consumption
- ✓ Built for the future: suitable for mono-materials, PCR or paper, solvent or water-based inks
- ✓ Simple, intuitive press operation

Technical Data

ALPHAFLEX

Color decks	8
Printing width	820 – 1270 mm (32.25" – 50")
Repeat length	max. 800 mm (31.5")
Press speed	400 m/min. (1300 ft/min.)
