

FLEXA[™]

The premium stack type printing press

Why FLEXA[™]?

FLEXA[™] is the premium printing press for industrial packaging. This stack type machine expands our extensive CI printing press portfolio. FLEXA[™] has been developed with the W&H printing expertise taken over from the premium CI printing presses like MIRAFLEX[™] or NOVOFLEX[™]. Format range, speeds, quality and assistance systems of the FLEXA[™] are designed to fully meet the special requirements for industrial packaging production. This printing press provides a high degree of versatility as it is suitable for printing on film and paper, flat web and tubes, front and back side as well as for inline and offline applications. Using the pre-make ready function, operators can prepare the next job while the press is running.

Your advantages

- ✓ Special focus on industrial packaging in terms of formats, printing quality and assistance systems
- ✓ Versatility: film / paper, flat web / tube, 3–8 colors, inline / offline
- ✓ Long repeats up to 1350 mm (53.1")
- ✓ Easy front and back side printing
- ✓ Each idle color deck can be prepared for the next job during production
