

ARCOMAT 5

Next Level Palletizing

Why ARCOMAT 5?

The ARCOMAT 5 offers a maximum production speed of 40 cycles per minute, the fastest ARCOMAT we have ever built. This means stacks consisting of 10 sacks are even possible when our high-speed bottomer AD 8930 runs at its maximum speed of 400 sacks per minute.

Despite being the fastest ARCOMAT we have ever built, we were able to reduce the overall mechanical stress of the ARCOMAT 5. Based on the new electrical drive concept the ARCOMAT 5 is more reliable, needs less maintenance and offers an extended lifetime.

Stiffer base frames and improved gripper positionings lead to more stability, accuracy and better pallet designs for your production.

Your advantages

- ✓ Palletizing speeds of 40 cycles/min
- ✓ Improved gripper reliability and accuracy
- ✓ Less wearing and maintenance

Technical Specifications

ARCOMAT 5

Sack width	18 – 60 cm
Sack length	25 – 118 cm
Speed	40 cycles/min
