WINDMÖLLER & HÖLSCHER

EASY MODULES

The perfect assistance for the operator during the job change

Why EASY MODULES?

- **Impression setting modules**
  EASY-SET S supports impression setting before accele rating the press. The superior EASY-SET HD allows a fully automated, very precise impression setting based on the inspection of the actual print out during your first pull.

- **Register setting modules**
  EASY-REG S uses sensors and labelled sleeves for a register setting at stand still of the press.

  EASY-REG M is a drag and drop system for highest flexibility to be used with any plate or sleeve.

  EASY-REG D is the most precise register system working fully automatic using inspection of actual print outs.

- **Color adjustments at press**
  EASY-COL is W&H's Integrated system for color adjust-ment at press before starting the print job. Besides, ink consumption is monitored permanently for ink savings, higher efficiency and improved sustainability.

- **Operator guidance**
  EASY-SETUP is designed to empower operators, even those with little experience, to set up any W&H press independently and get it back into production with the right quality.

Your advantages

✔ EASY-SET for automated impression setting of the print decks

✔ EASY-REG for quick register setting

✔ EASY-COL for inking and color adjustments at the press

✔ EASY-SETUP for intelligent and optimized operator guidance through the entire setup process
